CIRCULAR

Ref. No. CS/2026-27/C-21
Date: June 05, 2026
File: Circular to Parents 2026-27

Subject: Consent for HPV Vaccination of Students

Dear Parents/Guardians,

As part of the Government Health Programme, we have received instructions from the Health Department regarding the administration of the Human Papillomavirus (HPV) Vaccine for girls in the age group of 14–15 years**.**

The HPV vaccine is recommended to help protect against certain infections that may lead to serious health conditions later in life. The vaccination will be administered by authorized healthcare professionals in accordance with the guidelines issued by the health authorities.

We appreciate your cooperation in supporting this important health initiative.

To enable your child to participate in this vaccination programme, we kindly request you to provide your consent by completing and signing the consent form given to your ward. If you are not willing to take the vaccine (HPV), do not submit the consent form to the school.

The school is only assisting in coordinating the programme with the Health Department and shall not be held responsible for any adverse effects, complications, or issues that may arise in connection with the vaccination.

Once the consent form is received from the parents, we will inform you of the next steps.

Thanking you,

Fr. Jinosh V. Mathew, CMI
Principal
